

I believe the FCC should work to retain media ownership limits. Now 6 conglomerates dominate the US Media. Independant radio stations have declined by 33% since 1996 with 2 companies owning a whopping 1,340 stations. This reduced competition limits local voices while increasing ad rates. Democracy depends on a free press - please, please at the very least hold public hearings. The unholy alliance between corporation and government is ruinous to the very ideals that were put in place by our founding fathers. To allow more consolidation in the media is to limit the very voice of our democracy.
